

PROTERMINAL

POLISHED, BRUSHED AND VARNISHED ALUMINIUM

PROTERMINAL is a L-shaped profile in polished, brushed and varnished aluminium that can be applied on external corners of coverings. It can be used to close the perimeter of coverings, like a connection profile between step tread and riser of stairs coated with ceramic or natural stone tiles and also as separation profile for floor and wall coverings (the varnished only for wall application). Its particular section and the availability in different finishes make **PROTERMINAL** a much sought-after profile that allows a workmanlike application.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose "PROTERMINAL" according to the tile thickness and desired finish (color).
2. Cut "PROTERMINAL" to the desired length and apply the adhesive on the support where the profile will be laid.
3. Press the anchoring flange of "PROTERMINAL" into the adhesive.
4. Lay the tiles, aligning them with the profile leaving a 2 mm joint. Remove immediately all remains of adhesive from the surface of the profile.
5. Fill the joints between the profile and the tiles with grout, in order to avoid water stagnation. Remove immediately all the remains of grout from the surface of the profile.
