TIBIA SAFE knee pads

MC4949Z9

DETAILS

- Kneepad made of polyester, EVA foam, TPU, and nylon, ensuring an ideal balance of strength, lightness, and comfort, with excellent long-term durability;
- Tibial and knee protection, offering complete coverage of the most exposed area, increasing the operator's safety level.
- Adjustable elastic straps ensure a stable, personalized, and comfortable fit, preventing slippage during movements.

FEATURES

Professional kneepad made of polyester, EVA foam, TPU, and nylon, designed to offer complete protection for the knee and shin during work activities. The structure ensures high shock absorption capacity and effectively protects against small shards, splashes, and accidental impacts, improving operator safety. The adjustable elastic straps ensure a stable, comfortable, and adaptable fit for various body types, making the kneepad ideal for prolonged work on construction sites, in workshops, and industrial environments.
